## A MESSAGE FROM JOHN PAGE

"I have been designing and building guitars since the mid 1970's. Many of those years, 21 in fact, were spent at Fender® Guitars... the first 9 as a Guitar Designer in Research & Development, and the last 12 as the co-founder and head of the Fender® Custom Shop. During those years I worked with some incredible people and created guitars for some great artists. Artists like Eric Clapton, David Gilmour, Pete Townshend, Elliot Easton and Cesar Rosas, just to name a few. Now, for the first time, with John Page Signature, my custom designs are available as production models, hand-made in the USA by my team of expert builders, built to be heard and played for generations."

## FENDER® BEGINNINGS

1978 - 1987

I started at Fender® in 1978, when I was 21 years old. As a Model Maker, I (left) worked alongside the great Freddie Tavares (right), who worked under Leo Fender himself. Under Freddie's mentorship I became the youngest guitar designer in Fender history at 23 years old, rising to Senior Design Engineer over the next several years.

## FENDER® CUSTOM SHOP

1987 - 1998

I was thrilled to co-found the Fender® Custom Shop - The legendary "Dream Factory", with Michael Stevens, and leading the charge for 11 years. I took on the management of Guitar Research and Development during most of those years as well, going from Design Engineer to Vice President with lots of different hats in-between.

## JOHN PAGE GUITARS

2006 - present

Twenty years ago, I sat down at my drawing table and designed a new guitar... The P-1. It was a combination of all the things I had wanted to do in prior years but hadn't gotten to - an evolution of everything I'd learned at Fender® - and since it was "my" guitar, I could design it my way, not Fender's or any other company's way. That day, John Page Guitars was born. The line grew to seven guitar models, two bass models, and a line of hand-made wood and stainless steel bridge saddles... JP Woodtone.

## ART GUITARS

a lifelong journey

The Pantages, the Manzanar, The Retablo... My most recent art guitars take my merging of visual art, guitar design, and engineering further than I have ever ventured in the past. With the hours taking to create these ranging from many hundreds to well in excess of two thousand, these are the truest expression of John Page: The Artist.

# JOHN PAGE SIGNATURE

"I've always wanted my guitars in more hands than my custom shop would allow. John Page Classic did just that, and they were a smash hit for their quality and value, but there were compromises. What if we didn't have to compromise anything?

John Page Signature is an evolutionary leap forward, hand-building my custom designs in the USA to my exacting spec. In close collaboration between myself and Master Builder Chase Gullett and his team, the best of my custom designs are available as hand-built, small batch production models. Signature is the closest thing to a John Page custom guitar ever made by hands other than my own." - **John Page**

CHASE GULLETT

# THE AJ

The AJ is John's take on the classic T-style. Everything John learned and developed at Fender goes into the AJ, with a Bloodline® JP-3P P90 in the neck position and our reverse-angled JP-3T on the bridge for pristine tone without the harsh ice-pick highs.

*"The AJ is a perfectly conceived T-style guitar packed with stylized refinements and stellar tone that puts it in a league above custom guitars that are nearly twice its price."*

# THE DL

The DL is a true evolution of the Fender® bolt-on tradition, offering a hybrid of T and S style with five pickup positions offering a variety of tonal color and a responsiveness that sounds totally new, yet familiar. It's what John calls "Cowboy Punk."

It houses two Bloodline® JP-3P P90s in the neck and middle positions and our reverse-angled JP-3T in the bridge.

*"The John Page Signature DL is a knockout instrument imbued with modern performance enhancements. Partnering dual P-90 pickups and a reverse-angle T-style pickup with stylish looks, the DL is a "daringly loud" six-string to wield." - Paul Riario*

# THE NOAH LEVINE SIGNATURE DL BARITONE

DESIGNED BY JOHN PAGE AND NOAH LEVINE  
COMING SUMMER 2026

## NOAH LEVINE

Noah Levine's meteoric rise is one for the books, and it's only the beginning. For the past 18 months, Noah has been Noah Kahan's right hand man, playing lead guitar with Noah's live band, selling out arenas nationwide and co-writing the hit single "Dial Drunk" with Noah Kahan and Post Malone.

# THE ASHBURN

The *Guitar Player* Hall of Famer and *Guitar World* Platinum Award winner is back, now hand-built in the USA to John's exacting specifications.

*"Right out of the box, the Ashburn sounds and plays incredible. The pickups deliver rich, harmonically complex tone with percussive punch and bodacious midrange usually only found in the most desirable vintage Strats. If you want Stevie Ray's shade of blues, it's here, but so is Uli Jon's hard rocking drive, Jimi's snarl and Jeff's howl. The neck is as comfortable as a velvet couch overstuffed with Siberian goose down, and the deep cutaway makes it as easy to play at the 22nd fret as it is at the first."* - Paul Riario

# THE BARITONE

## COLLECTION

John has introduced a new 23-fret, 27" baritone neck —crafted to bolt seamlessly onto any of our standard AJ or DL bodies. It delivers true baritone depth while preserving the signature ergonomics and playability our guitars are known for.

# THE RELIC

## COLLECTION

Under John Page's leadership, the Fender® Custom Shop unleashed the relic revolution into the world. John even coined the term "relic"!

In tribute to that legacy, John Page Signature Relics are the only models we finish in nitro, each one hand-aged with care by the legendary Robie Canlas. The result is a subtle tonal character distinct from poly finishes, paired with a look that honors the past while carrying its story into the future.

# THE PRIVATE RESERVE

## COLLECTION

The pinnacle of John Page's half-century of design and craftsmanship. Each Private Reserve guitar is hand-selected from rare, one-of-a-kind woods and built in ultra-limited numbers. These are heirloom instruments — designed with the same playability, tone, and feel that define every John Page Signature model, elevated by aesthetic details and materials reserved for collectors and connoisseurs.

For players, it's the ultimate expression of Page's design philosophy. For collectors, it's an investment-grade guitar with no equal.

Flamed Mahogany sourced from  
The Philippines circa 1965.

Compression grain Koa  
from Hearne Hardwood's  
"Rainbow Tree".
